# How Far Are We?

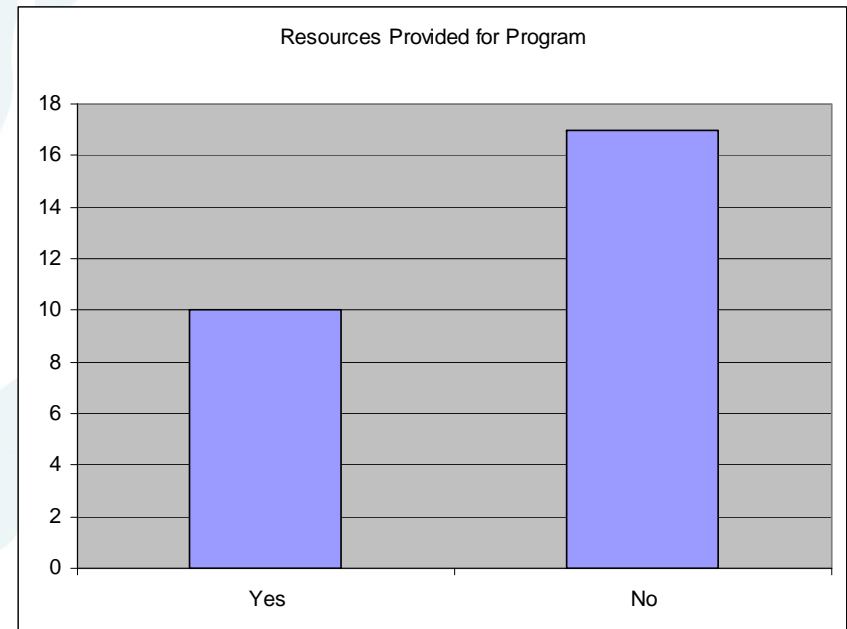

- Lead identified – 100%
- ABHR Product selected – 100%
- Dispensers installed – 100%
- Education commenced – 100%\*
- Auditing commenced – 50%
- Reporting commenced – 45%

# Pre-Visit Phone Survey

- 100% surveyed – less than half noted additional resources
- Readiness Status :
  - High Priority: 10
  - Medium Priority: 8
  - Low Priority: 9

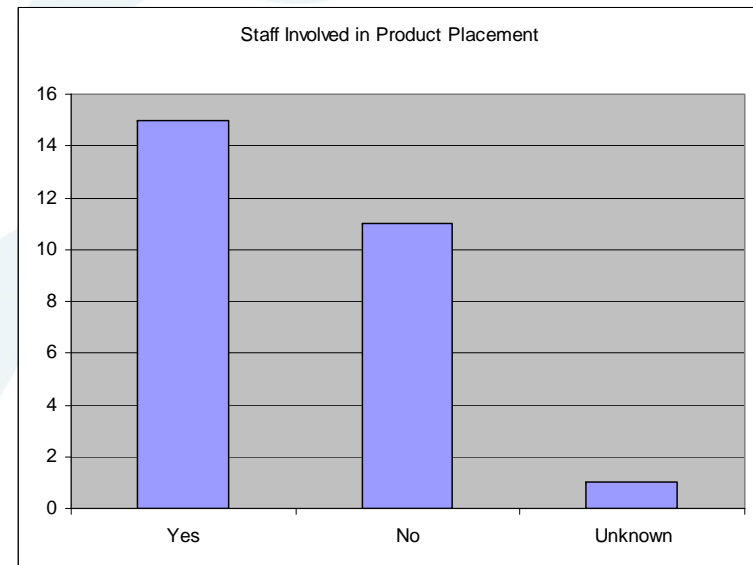

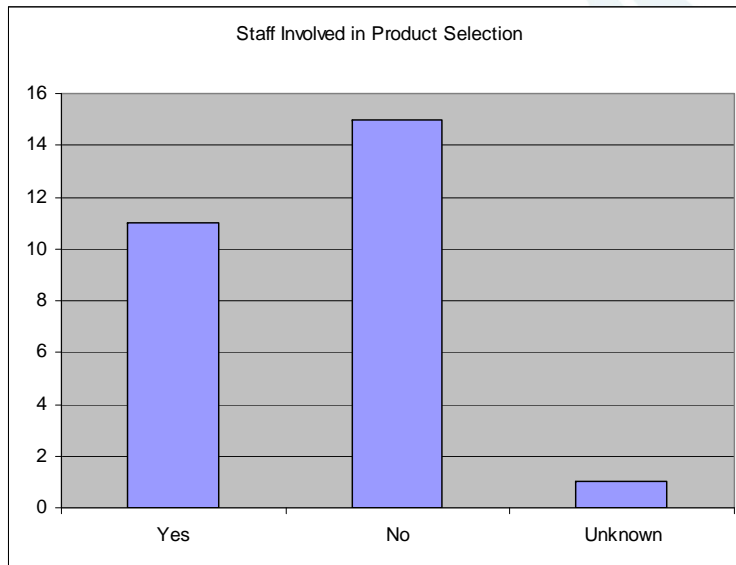

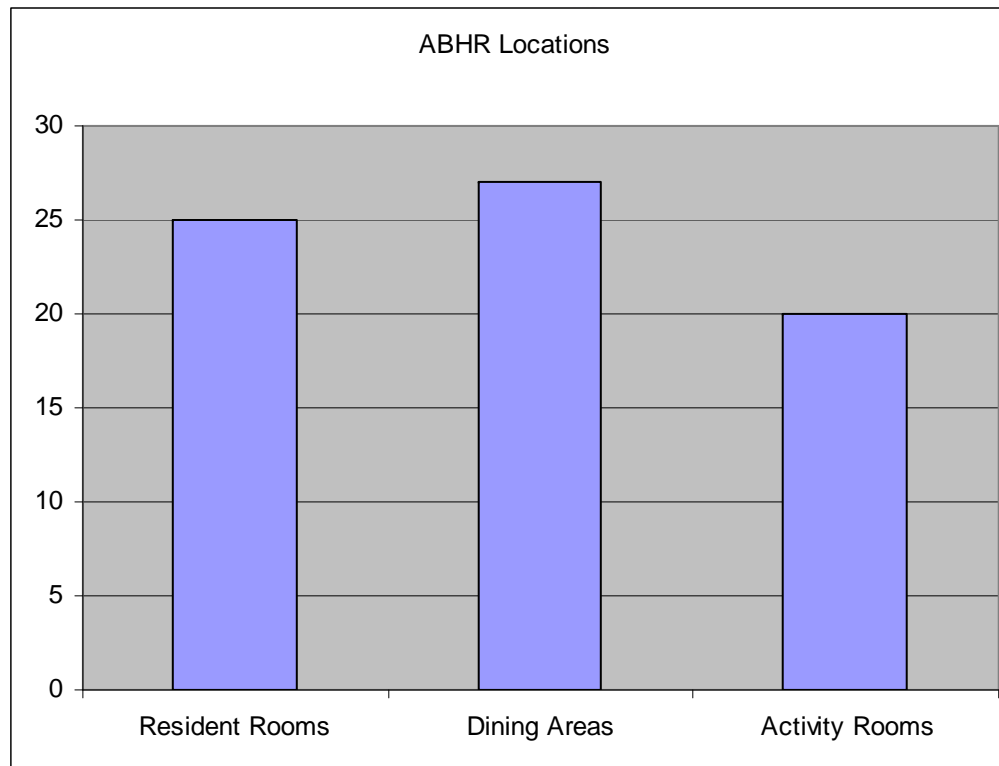

# ABHR Product

40% noted staff involvement in product  
*selection*

55% noted involvement in product *placement*

# ABHR Locations

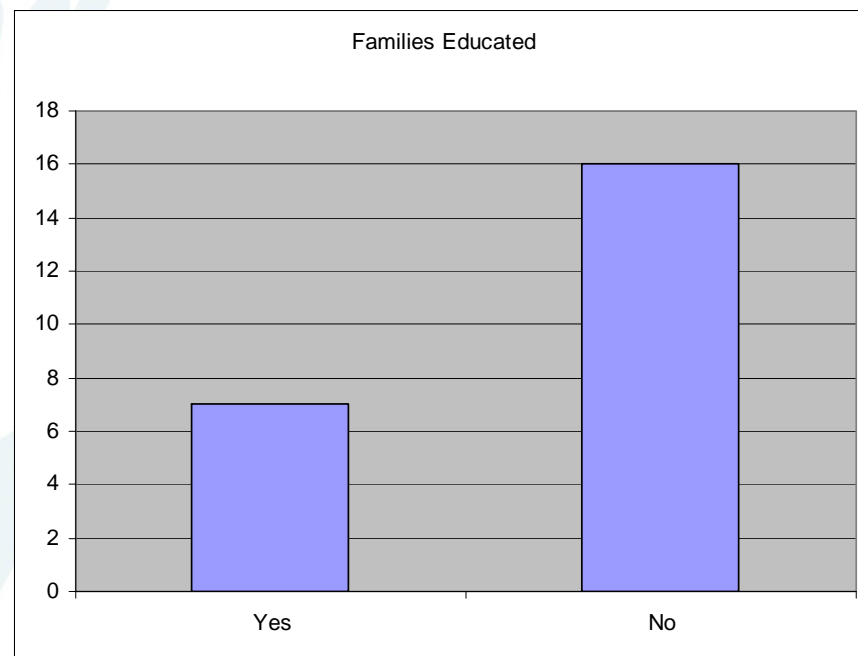

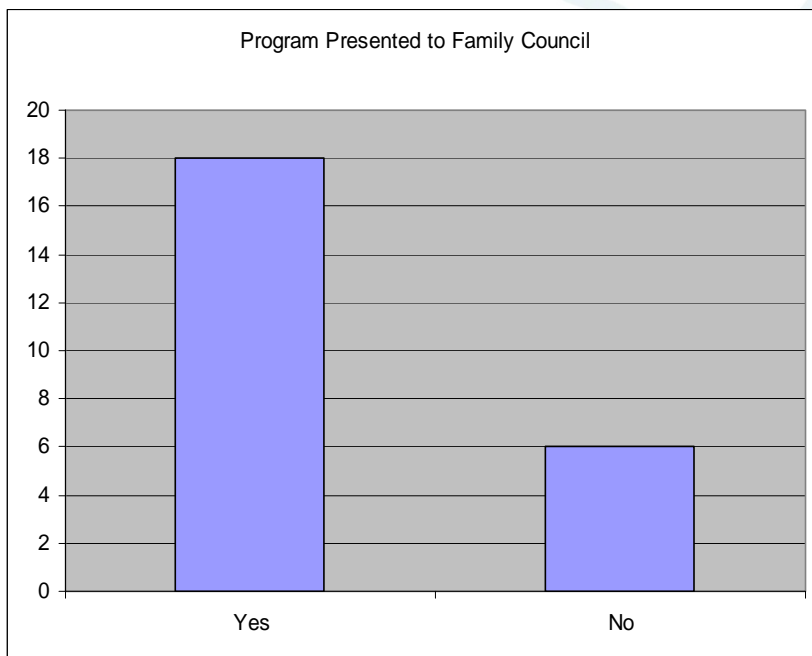

- But only 17% are in resident bed space (24 *on-site visits*)

# Education: Staff

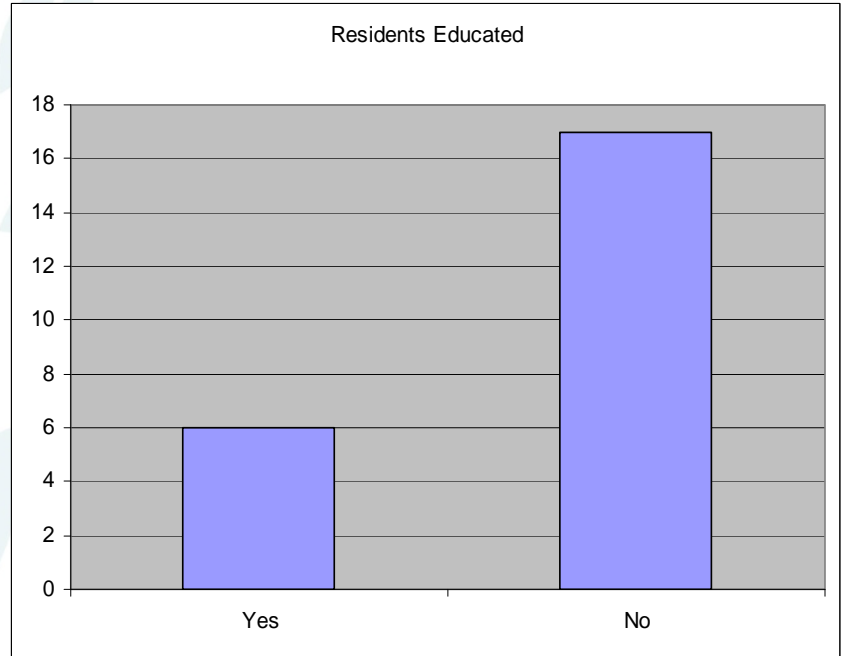

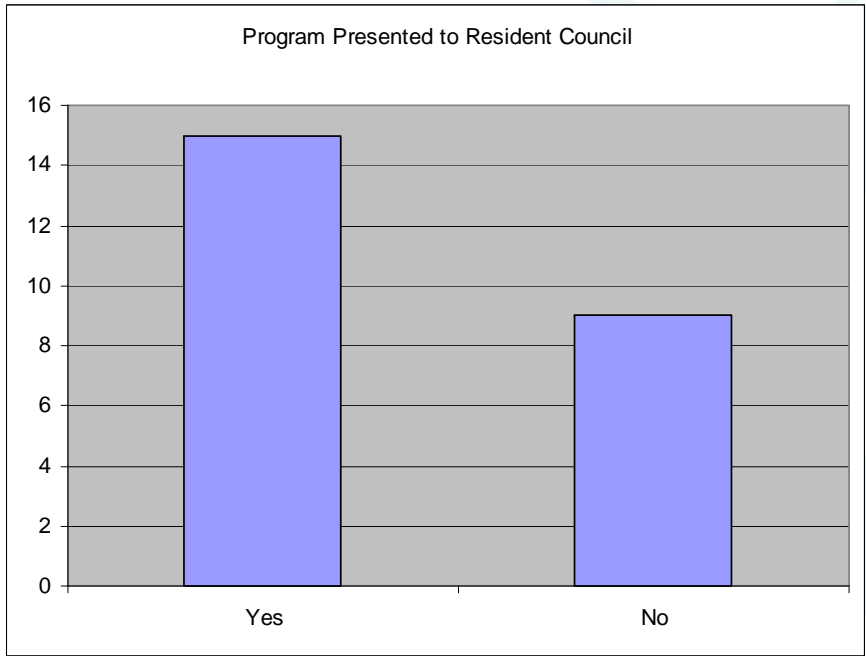

- 
- Leads:
    - All facilities had attended MHICN initial and auditing training
    - 2 of the current leads had not participated in auditing training
    - 70% describe the 4 moments (*in 24 on-site visits*)
  - Staff training:
    - 87% direct care workers
    - 75% on all shifts
    - 62% of non-direct care workers
  - Hand Care Issues:
    - 71% have hand lotion
    - 62% have designated person and 29% have a non-intact skin policy
-

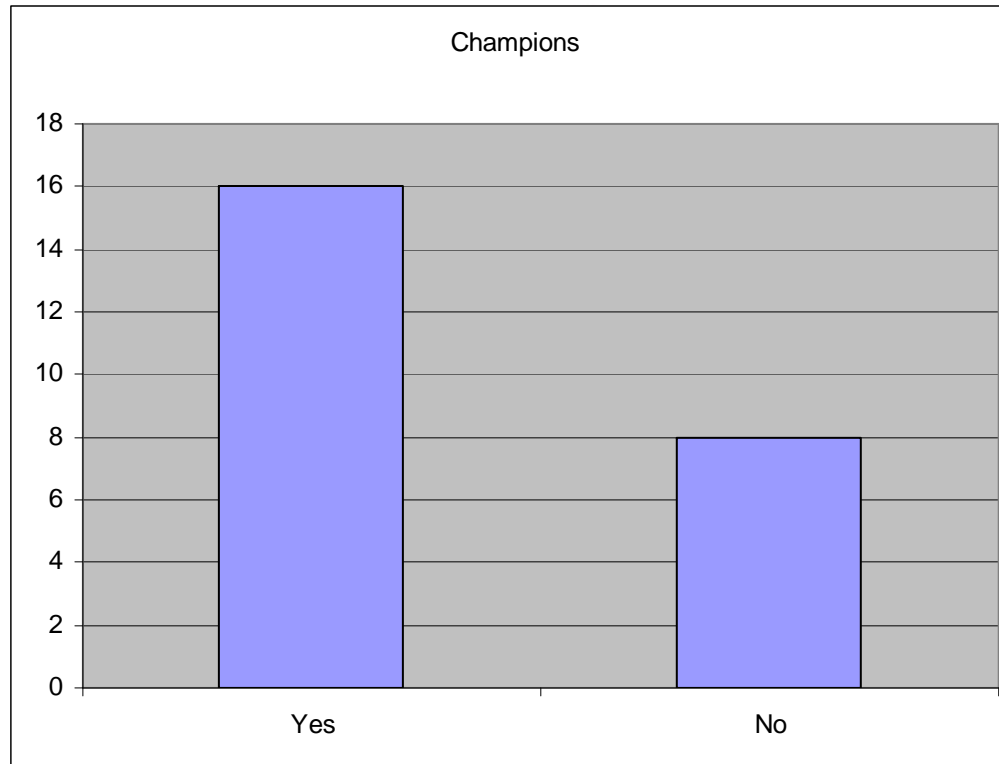

# Education: Families

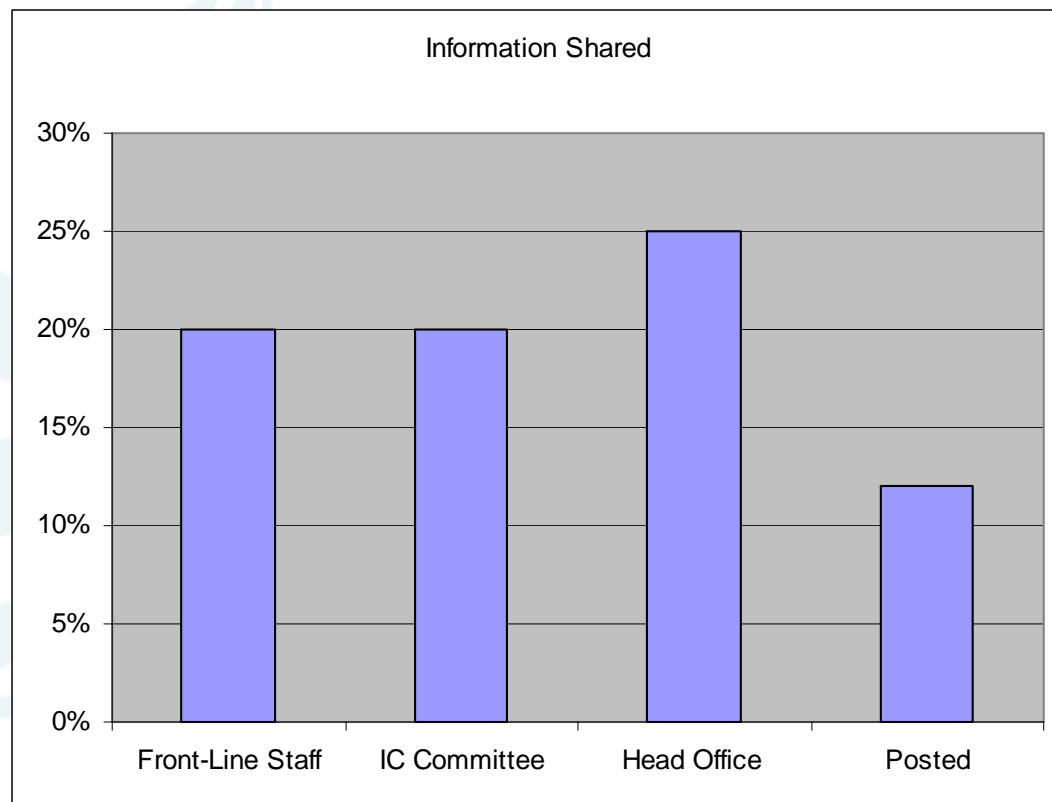

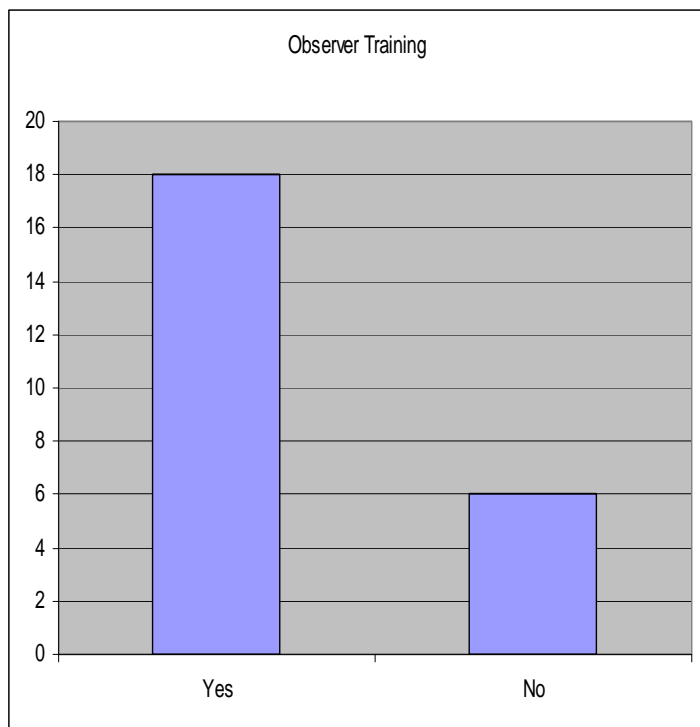

# Education: Residents

# Champions?

# Auditing

# Tips for Success

- Product
    - At wheelchair height
    - Individual for residents with infection
    - Try empty ones first for cognitively impaired
    - Develop a good relationship with administration and maintenance to move dispensers when necessary
    - Automatic at entrances
    - Flags to indicate when empty
  - Education
    - Stop video and discuss gloves, etc.
    - Bring in coffee and donuts (nights)
    - Role model (Doctors too!)
-

# More Tips for Success

- Promotion
  - Posters (elephant) and music (singing nurse)
  - Use the tools at every orientation and other mandatory education
  - Make it fun!
- Audits
  - Have each unit do their own

# Thank you
